THOMSON LICENSING S.A.

1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.
4. **REMINDER**

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices)(Article 39(1))(see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

\*\* Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.

## INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.  
PCT/US03/27989**V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement****1. STATEMENT**

Novelty (N)

Claims 1-12 YESClaims NONE NO

Inventive Step (IS)

Claims 1-12 YESClaims NONE NO

Industrial Applicability (IA)

Claims 1-12 YESClaims NONE NO**2. CITATIONS AND EXPLANATIONS**

In regard to Claims 1-12, the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest a system or method wherein "the allocating of predetermined storage limits for the plurality of clients includes allocating identical and/or different storage limits for the plurality of clients."

Hejan (US 6,598,228) discloses a storage system for recording of broadcast programming having various storage mediums as seen in Figure 1. The system has various storage mediums as seen in Figure 1 and with the use of FIFO buffers utilizes the storage when playing back data as seen in Figure 2 and described in Column 4 lines 33+. Thereby fails to disclose an allocation of a predetermined storage limit to a plurality of clients with the storage either being identical or different storage capacities.

Haraguchi (US 5,974,217) discloses a video on demand system for delivering program data to various clients on a network as seen in Figure 1. The storage system of each client is determined by a buffer as described in Column 9 Lines 50-66, which allows for storage size that is large enough to be able to store the output of the system; however fails to disclose a storage system with a predetermined storage limit which is monitored and checked for storage capacity being reached. Therefore, it is seen without a predetermined storage limit it further lacks allocation of varying storage limits depending on the clients.

Vallone (US 6,642,939) discloses a multimedia scheduling presentation system for recording and scheduling various multimedia programs. As seen in Figure 1 the system has storage capabilities in a form of a hard drive and also presents other recording features (pause, rewind, etc) as seen in Figure 26 and 27. The storage medium allows for storage of programs from one user/client and allows recording until the storage limit is met as described in Column 20 Lines 23-32. The system fails to disclose an allocation step of determining identical or different storage limits of users/clients.

In regard to Claims 1-12, the criteria set out in PCT Article 33(4), and thus meets industrial applicability because the subject matter claimed can be made or used in industry.
